

Floral arrangements and design for weddings and events for Ixtapa Zihuatanejo

We are very careful to select and designed roses and flowers for your bride bouquet, ceremony and reception.

We can e-mail you pictures of the bride bouquets, arches, center pieces, etc.

We have available all types of flowers and roses: tulips, orchids, calla lilies, liciantus, larkspurs, daisies, roses, minioroses, gerberas, bird of paradise freesias, gardenias, stephanotis, delphiniums, carnations and many more.

We have traditional, round-style bouquets wich are the most popular with brides and their attendants, simply but elegant styling suitable for formal and informal weddings.

Round-style bouquets can vary in size from large to small, but like cascade bouquet, they should be proportional in size to the person who will be carrying it.

Cascading bouquets are a traditional favorite with brides because of its full flowing appearance. This elegant styling is usually carried by the bride, but is also popular for attendants when the bride wants a formal or sophisticated look, cascade bouquets should be proportioned to the size of the bride and her gown to create the ultimate floral accent.
